

# Serebra Campus

Serebra Campus is a versatile, web-based learning management system (LMS) that enables organizations of any type or size to deliver and track professional training and development.

## Key features

Our LMS will allow your organization to deliver a comprehensive educational program that includes both self-paced, online learning as well as instructor-led classroom or webinar sessions. Our solution is provided in a Software as a Service model, which eliminates in-house hardware, software or hosting infrastructure requirements - saving both time and money.

### Extensive course library

Choose from over 7,000 off-the-shelf e-learning courses or upload your custom AICC & SCORM content

### Account management

Organize users into vertical & horizontal groupings; synchronize the user directory with an existing LDAP, Active Directory or OpenID system

### Customized branding

Use your logo, colours & messaging to customize your website and completion certificates

### Fees management

Apply different payment models such as pay per use, enterprise licensing or e-commerce

### 20+ Reports

Generate enrollment & completion reports based on various criteria including date, course and user grouping

### Post-training evaluations

Collect learner feedback with evaluations and configure them to be mandatory or optional

### Administrator interface

Use our web-based admin interface to track, manage and report on student training activities

### Enrollment management

Allow learners to directly enroll in courses or require them to submit enrollment requests for manager approval

### Learning plans

Organize courses into educational paths directly related to employee career plans and goals

### Training dashboard

Provide a snapshot of training progress with an emphasis on compliance and learning plans

### Mobile access

Access the training calendar, register for events and take assessments on your iPhone

### Technical support

Telephone and email technical support included Monday to Friday, 7:00 am to 3:00 pm PST

## Additional modules

### Event management

Create a calendar where students can register for instructor-led, classroom and webinar events

### Exam creation & management

Create customized exams for events, webinars and custom e-learning

### Compliance management

Manage compliance rules (one-time and renewing) to enforce mandated training for groups of learners
